

BKArmor Wear & Care

The BKArmor is a revolutionary designed protective shield for below knee post-amputation management.

BENEFITS

- Facilitates healing
- Reduces swelling
- Protects the limb from injury
- Maintains knee range of motion
- Controls limb volume to prepare for a prosthesis

WEAR TIME

- Wear at all times except for bathing and for skin evaluations.
- Your doctor will advise when the BK Armor is no longer needed or if a modified wear schedule is indicated.

APPLICATION INSTRUCTIONS

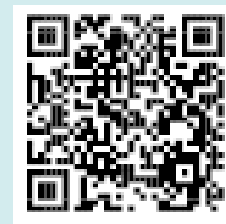

- Roll on the white compression sock.
- Apply the charcoal mesh padded end cap over the sock.
- Place your limb into the back plastic shell with the open side facing up. Rest your limb on the bed while inside the shell. Position your limb to contact the bottom end cup.
- Apply the smaller black neoprene closure with the white logo tag centered on the upper area of the thigh. Pull the cover snug and secure it to the Velcro on the sides of the shell.
- Repeat the previous step with the larger black neoprene cover. Both covers should be snug. These may require to be tightened upon weightbearing to maintain proper fit.
- Always rest the end of your limb on a pillow. The pillow should be as far away from your knee as possible under the end of your residual limb.

SUPPLIES PROVIDED

- White socks (6)
- Charcoal mesh end caps (2)
- Suspension belt
- New amputee information packet
